# IMPOTENCE CLINIC

## **90% of all men respond to simple treatment!**

Impotence is a common problem which occurs more frequently with advancing age, affecting around one in six men by the age of 50.

Impotence is the inability to attain or maintain a penile erection for satisfactory sexual intercourse. Issues such as loss of libido (interest in sex) or arousal, orgasm and ejaculation problems also fall into this category.

If you and your partner wish to enjoy a loving, sexual relationship, you do not have to accept impotence as inevitable.

Whatever the cause of it, effective treatment for impotence can be provided. 90% of all men will respond to simple treatment.

Treatments include Viagra, Levitra and Cialis.

Dr Choudhuri, Dr Jabbar and their team strive to offer you the best and safest tailor made treatment plan. They personally carry out or supervise all treatments. They are members of the Royal College of General Practice and the British Medical Laser Association (BMLA).

19 Malvern Road, Mapperley  
Nottingham, NG3 5GZ
